

The Parikrma Inside Initiative

The Bashettihalli Government School is yet another school adopted by Parikrma. The government school & Parikrma children painted the school's walls as part of the ongoing improvement program. Children were free to experiment with themes, and they always never failed to surprise us. Interactions between students of different schools, learning new skills, hands-on fun activities and a school with a new avatar full of children's dreams and inspiration... The Parikrma Inside™ program.

Parikrma Impact

Hello Shukla Akka, Yesterday I had my Graduation Day! I finally completed my Computer science Engineering with distinction marks in all the semesters. I never thought this could be possible by me and it's only because of Parikrma to whatever I am today. Thank you Akka for supporting me in each and every step of my life. I will forever be grateful and a proud product of Parikrma.

"When you read this message sent by my alumnus Pavithra, you will understand why I don't need to say anything. My heart bursts with pride." - Founder, Shukla Bose

Our alumnus Chaithra was featured in the news to announce her third Kannada movie. She says her introduction to acting happened in our school morning assemblies! If you haven't seen her earlier films, then you should. She has stayed away from the conventional heroine roles and has chosen characters that are challenging. She is immensely talented and a natural, but we take pleasure in acknowledging that we, too, played a role in providing her with the exposure and opportunity. We love seeing her back in school whenever she gets the time. Let's wish her latest movie the very best.

Reading corner

We are proud of our alums working for us – over 18 teachers and several other staff. "They are the ones who will change the narrative of the lives of the poor and tell the story differently," shares founder Shukla Bose in her new blog piece.

Thank you!

Our children (65 students) have access to the Coerver Players Club to assist them in practising their soccer skills through a fun and engaging online platform. Thanks to the Coerver Coaching Asia Pacific and Coaches Across Continents!

Outside the classroom

A day well spent - learning about robotics and CNC machines. A visit to FANUC India was full of interactions with experts and a lot of fun for our children, who were exposed to the new future of IoT and automation. A shout out to FANUC India for making this happen!

You can make a difference!

Every year, as part of the regular health check-up, every student's height and weight are measured. We want to make the equipment available to students and teachers in their schools. We are investing in digital weighing machines and height measuring scales at each of our centres. We also want to upgrade our medical kit and emergency aid kit at all our centres.
