

## Great Place for Women to Work in India

1/1

Three years in a row! Parikrma Foundation is a Great Place to Work™ certified for building High-Trust & High-Performance Culture™

The happiness school has a story of love and togetherness - and yes, no absentees.

When gender equality - advocacy, and empowerment are our cornerstones: At Parikrma, over 50% of the students are girls. They are our first preference during admissions. Our work in the community is primarily centred around women's empowerment and health. We have our own football club - the team comprising girls from underserved communities, from remote corners of the country.

We are incredibly thrilled to inform you that we are certified among India's Top 75 mid-size organisations "Best Workplaces for Women".

## Parikrma Impact

Parikrma children bagged first place in the essay competition held by Art Mantram

"A great day to be with our Parikrma student Lalcha who just graduated with a Law degree from National Law School, Bangalore. He is the only lawyer from his village in Manipur. He plans to take the judiciary exam and become a judge in his state. He says he now understands the meaning and responsibilities of a "first generation learner". He realises that he has to change the mindset of how his people think and how others think of his people: a way to go, Lalcha. We have your back." - Founder, Shukla Bose

## Setting an example!

The Parikrma Girls Football Club bringing poor girls from remote Bengal, Assam, Orissa, Manipur, Madhya Pradesh, and Karnataka to play professional football, is now rearing to go. The first match began with 11-0 win against Rebels Women's FC in the Karnataka Women's League 2022-23.

## Outside the classroom

Once a week, folks from Spiders and the Sea interact with our children at the #afterschoolinnature. What does nature mean to you? How are we all connected? More similar questions are being explored during these sessions to understand nature in our cities.

## You can make a difference!

Every year, as part of the regular health check-up, every student's height and weight are measured. We want to make the equipment available to students and teachers in their schools. We are investing in digital weighing machines and height measuring scales at each of our centres. We also want to upgrade our medical kit and emergency aid kit at all our centres.
