

Parikrma Newsletter For November 2022

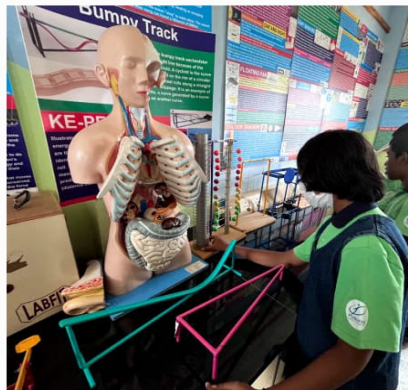

Tue, Nov 29, 2022 at 11:40 AM

Happy Holiday Season!

Parikrma
Humanity
Foundation

Sponsor our “fresh stock of inspiration”

This giving season, we assure you, this little gift will go a long way in changing lives.

Learning at Parikrma is a fun exercise:

An entire classroom becomes a chess/snake & ladder game – with floors painted as a chessboard and another with snakes and ladders. We have science labs that go beyond the usual with specimens and observatories. History classes are never without life-size maps taking kids on journeys to the past. The junior classes are full of toys and props – a perfect set-up for a fun quiz.

Each day, a 45-minute reading session mandates a wide range of fully stocked libraries.

We are currently looking at investing in what we call our “fresh stock of inspiration” - Books (fiction and nonfiction, graphic novels), dictionaries (different languages), games (indoor and outdoor), updated maps, toys for representation for Mercury classes (Grade 1), and specimens and slides for science labs, among others.

Cost: Covers fresh consumable stock at the library, science lab, and classrooms

Total cost: INR 44,500

Your contributions will help our children access the best enablers for better learning. It will also upkeep the Parikrma “stories of hope” – alums who are today entrepreneurs, social workers, lawyers, actors, chefs, marathoners, professional football players, software engineers and artists, among others.

Award

We are thrilled to announce that founder Shukla Bose received the Lifetime Achievement Award - Bengaluru Women Achievers 2022 from B.Pac CLIP Alumni Association.

New paper alert!

Published in the EduLearn 2022 Proceedings, the paper authored by founder Shukla Bose highlights the need to end the global education crisis that requires governments to become aware and sensitive to what stops about 50% of students from going to school.

The paper offers suggestions taking inputs from a replicable model in India.

Learning outside the classroom

Our children participated in the Inventure Academy Mock UN program - in their words, a few days spent (healthy) debating, interacting with peers, and a whole lot of learning.

Students from Srishti Manipal Institute of Art, Design and Technology conducted workshops for our children - Scratch was used to introduce concepts from science and math books and introduced them to Computational thinking.

Catch all the "FOOTBALL" action as it unfolds at this year's **Parikrma Champions League** by following us on the social media links below.

Date: December 11, 12, AND 13, 2022

Here's wishing you all a Merry Christmas and a fantastic holiday season ahead!
